

INTU

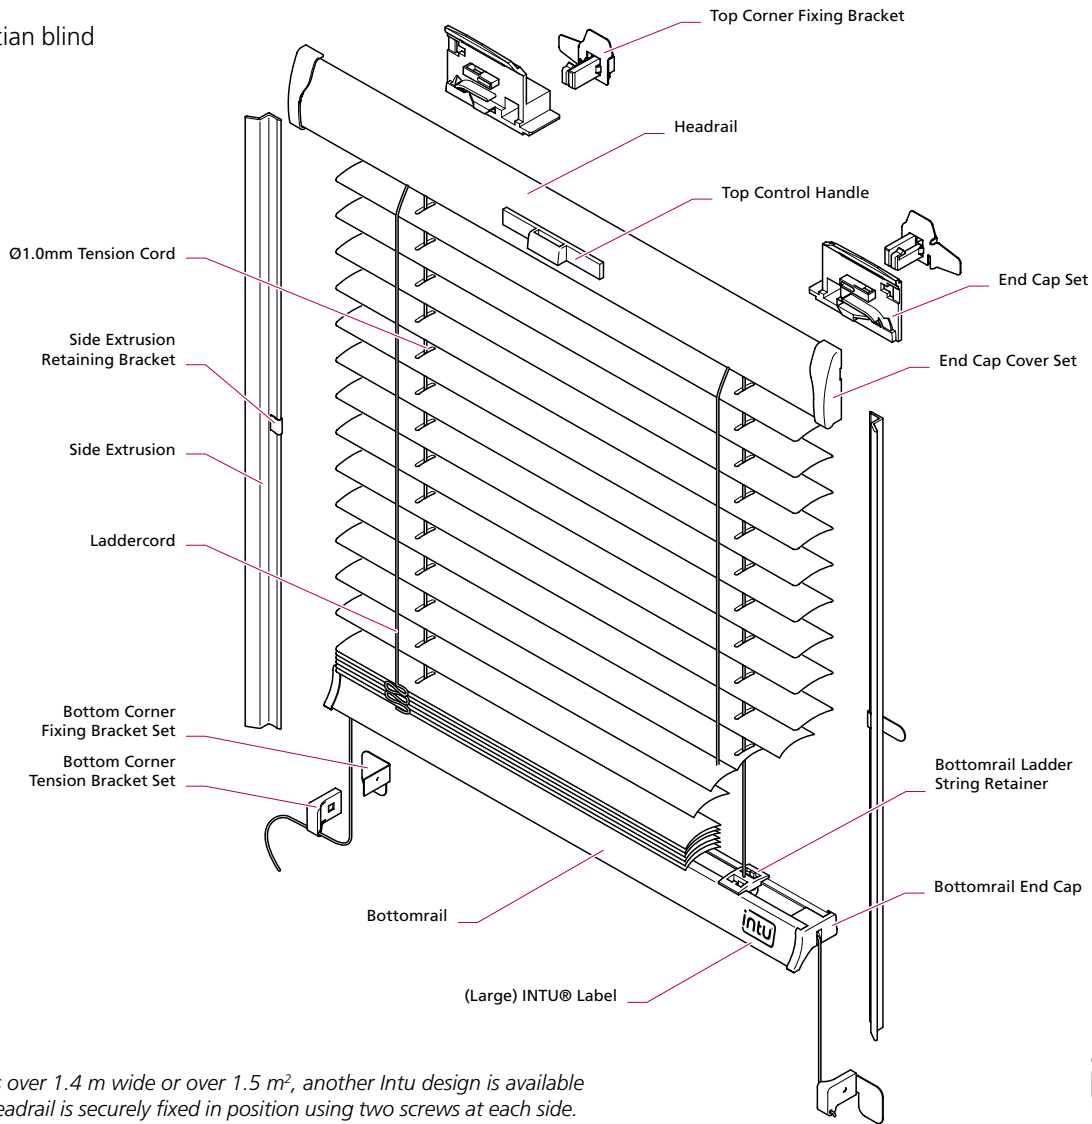

Sleek, modern integrated blind system – for unique VB, pleated and honeycomb products

Intu is a new, versatile and easy-to-install blind system designed to fully integrate with all modern window systems, including Tilt and Turn windows and glazed doors.

Equally suitable as a venetian, pleated or honeycomb blind, the Intu blind's sleek and modern aluminium profile fits perfectly into the bead of PVCu or wood windows. This conceals the working mechanism and fixing brackets but still allows complete control of light and heat. Operation of the blind is intuitive – simply raise and lower the bottom rail to the desired height. And with no hanging loop, Intu is also very safe for children.

Leading the way in the rapidly growing market for integrated blinds, Intu offers fabricators and retailers new sales opportunities, especially when taking advantage of the aesthetics and energy-efficiency of pleated and honeycomb fabrics. Intu is a unique, mid- to high-end performance product that is also cost-effective. Through the optimized and versatile hardware, assembly and installation are easy, and stock levels can be kept to a minimum.

INTU venetian blind

For windows over 1.4 m wide or over 1.5 m², another Intu design is available where the headrail is securely fixed in position using two screws at each side.

INTU materials

Venetian slats: 15, 16 and 25 mm
Pleated fabrics: 20 mm fabrics with the UniPleat® retention system
Honeycomb fabrics: 3/8" single-cell fabric

Installation

Just measure visible glass size and place order
Straightforward installation and easy to get good fit
